- **Front-end:** Development of reactive user interfaces with React, HTML5, CSS3, SASS
- **Back-end:** Design and implementation of RESTful APIs with Node.js or Python, creation of web services with Symfony
- **Mobile App:** Development of cross-platform mobile applications with Flutter
- **Deployment and Version Control:** Experience with Docker, Git, and CI/CD pipelines
- **Testing:** PHPUnit, Unittest
- **Development Methodologies:** Agile, Scrum
- **Project Management:** JIRA, Trello
- **Web Security:** Secure development practices, access and permission management

PROFESSIONAL EXPERIENCE

Fullstack Mobile and Web Developer

Freelance - Antananarivo

2022 - now

- Analyze client requirements for each project.
- Design the technical architecture of the application using Symfony, NodeJs, ReactJs, Flutter, Flask.
- Integrate APIs and third-party services, such as online payments and social media.
- Document code, procedures, and configurations to facilitate maintenance and collaboration.
- Provide ongoing support to the client, including bug fixes, code updates, and the addition of new features if necessary.
- Project management, including planning, budgeting, and communication with the client.
- Maintain a professional relationship with the client, manage expectations, and communicate effectively on project progress.
- Handle billing, contracts, accounting, and other administrative aspects related to freelance work.

Senior Web Developer

Human cart office - Antananarivo

2018 - 2022

- Design and development of highly performant web solutions using PHP, React, NodeJs.
- End-to-end project management, from conception to production deployment.
- Supervision of a team of developers, providing mentorship and ongoing training.
- Analysis of client requirements and drafting technical specifications.
- Optimization of performance and security for existing applications.
- Integration of third-party technologies and services, including the implementation of RESTful APIs.
- Effective troubleshooting and bug resolution, ensuring a seamless user experience.
- Continuous maintenance and support for existing applications.

Senior Web Developer

Comdata - Madagascar

2015 - 2018

- Analyze specific reporting needs of the call center.
- Design custom reporting applications to meet the call center's requirements.
- Develop web applications using PHP, ReactJs, NodeJs for report creation, generation, and visualization.
- Collaborate with call center teams to define key performance indicators (KPIs) for tracking in reports.
- Integrate data from various sources, such as call center databases and customer relationship management (CRM) systems.
- Optimize the performance of reporting applications, ensuring reports are generated quickly, even with large datasets.
- Ensure data security in reports by implementing appropriate security measures, including limiting access to sensitive reports. Provide ongoing support to call center users for technical issues or customization requests.

Web and Mobile Developer

Nogae Group - Madagascar

2013 - 2015

- Design and development of e-commerce websites using Content Management Systems (CMS).
- Design and development of web and mobile applications with PHP, Node.js, and React Native.
- Close collaboration with design and project management teams to meet client requirements.
- Implementation of best security practices to protect sensitive data.
- Creation of unit and functional tests to ensure application reliability.
- Participation in optimizing application performance, including caching and efficient SQL query implementation.
